

WHAT YOU SHOULD KNOW ABOUT ASBESTOS EXPOSURE

If you or someone you know would like to be tested, please call the trial lawyers of Kelley & Ferraro, LLP at (216) 575-0777 or (888) 839-8479.

Were you a building or construction tradesman, steelworker, or autoworker? Then there's a good chance you were exposed to deadly asbestos fibers.

Once inhaled, the microscopic fibers can cling to the walls inside your lungs. The effects may take decades to develop.

But eventually, they can cause the disease asbestosis, lung cancer, and the most advanced cancer — malignant mesothelioma.

Many companies knew about the hazards years ago. However, they neglected to tell workers and their families. Even today, workers are not always told about asbestos exposure. But there is something you can do. To protect yourself and your family, you can seek compensation for this wrongdoing.

When it comes to asbestos litigation, Kelley & Ferraro, LLP is one of the most experienced and successful law firms in the country.
